

**AMENDMENTS TO THE SPECIFICATION WITH MARKINGS TO SHOW
CHANGES MADE**

Amend the following paragraph(s):

[0027]

-- Instead of a mold carrier of a stack mold, it is also possible to attach on the rotary device according to the invention other elements. For example, as shown in FIG. 7, a holding frame 45, i.e. a so-called index frame or a so-called index plate, may be provided for a molded article 46, to permit a turning of this molded article 46 from a first phase to a second phase between the mold portions 9 and 10.--
